HARDWARE

ONE READER FOR MIXED CARD ENVIROMENTS

YSoft MFX4 combines LF + HF support in one compact authentication reader family for printers, MFDs, and other connected devices. It lets customers keep today's cards, support tomorrow's credentials, and roll out one consistent reader strategy worldwide.

Keep Existing Cards

Support legacy LF badges and newer HF credentials in the same deployment.

Simplify Rollouts

Standardize one reader family across mixed sites, regions, and printer brands.

Future-proof access

Guide customers to Lite, Reader, Mobile, or Ultimate without changing platform.

BUILT FOR PRINT AUTHENTICATION

Standardize one reader family across mixed sites, regions, and printer brands.

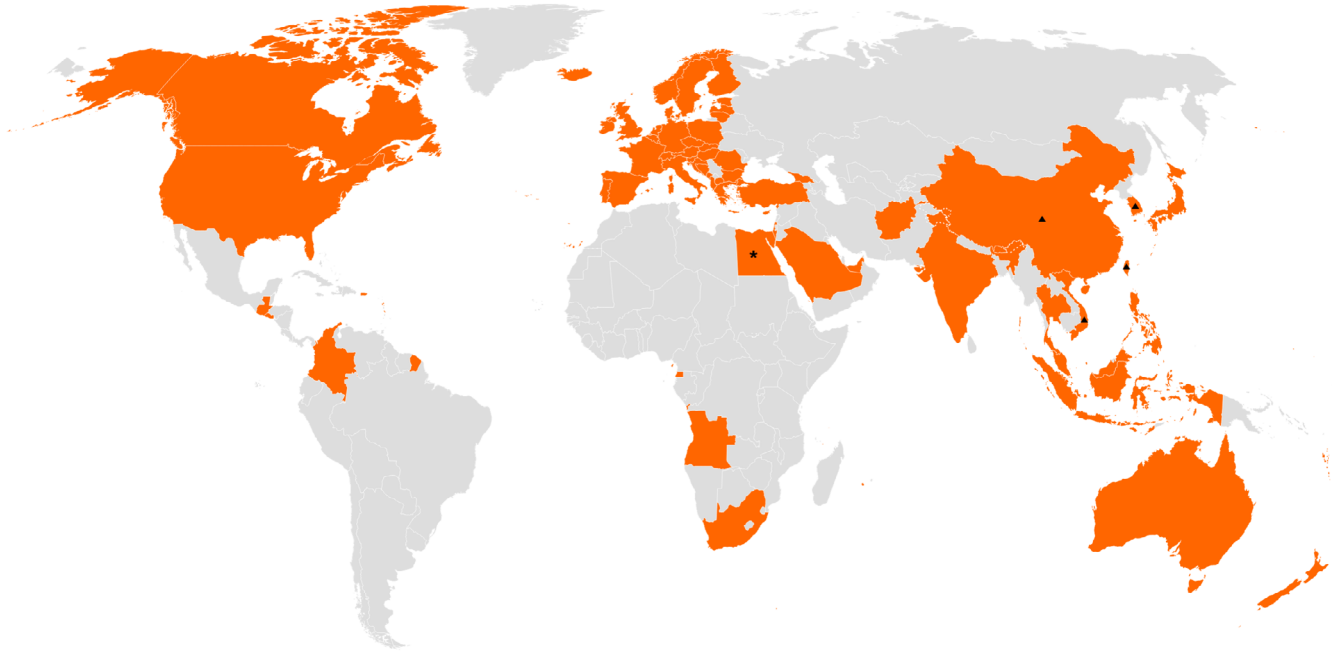

- Works with major printer manufacturers
- Plug-and-play setup in under 20 seconds
- Software-configurable across four variants
- Ideal for mixed LF/HF badge estates
- Designed for secure device authentication

MFX4 LITE | **MFX4** | **MFX4** MOBILE | **MFX4** ULTIMATE

SEE THE GLOBAL BENEFITS
