YSOFT HARDWARE

MFX4 MOBILE AUTHENTICATION

MOBILE-FIRST USER EXPERIENCE

Quick authentication using mobile credentials - via tap (NFC) or Bluetooth (BLE), depending on credential technology and reader model.

- **Tap to authenticate -** NFC is supported on all MFX4 readers.
- **Proximity options -** BLE is available on MFX4 Mobile and MFX4 Ultimate models, and only for credential technologies that support BLE.
- **Rollout options -** activation code distribution is supported only for YSoft Connect ID (LEGIC Connect Go).

CHOOSE YOUR MOBILE CREDENTIAL PATH

Existing Card in Your Mobile Wallet

You already have a card stored in your mobile wallet (Apple Wallet or Google Wallet).

MFX4 and MFX4 Ultimate support reading these cards.

To enable this, you need to identify which technology provider issued the card stored in your wallet. Once confirmed, the appropriate configuration can be applied by the Y Soft team.

Using a Third-Party Mobile Credential App

You are already using a third-party mobile credential app with an electronic card, or you know who provides your mobile wallet credential.

MFX4 and MFX4 Ultimate support these credentials through a custom card configuration prepared by the Y Soft team. Y Soft will verify compatibility and prepare the configuration. Once applied, the solution works out of the box.

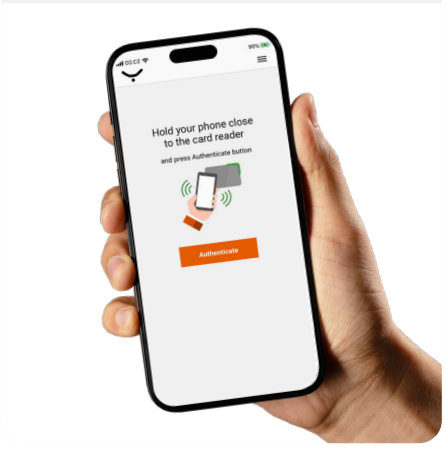

Starting Fresh with Mobile Authentication

You do not currently have a mobile authentication solution in place, but you want to use a mobile phone for authentication.

Y Soft offers the YSoft Mobile Connect app, providing secure, encrypted mobile authentication.

YSoft Connect ID credentials can be ordered and easily distributed and managed through SAFEQ Cloud or SAFEQ 6.

SUPPORTED MOBILE CREDENTIAL TECHNOLOGIES

Per-technology support overview (crossed items in the source are treated as NOT supported).

YSoft Connect ID

YSoft credential (activation code rollout)

N	NFC	Android	✓
B	BLE	Android, iPhone	✓
D	Distribution Activation codes	(LEGIC Connect Go)	✓

Distribution applies only to YSoft Connect ID.
