YSOFT OMNI BRIDGE AMPS UP PRINT VERSATILITY

Boost the performance of your legacy printers while supporting your hybrid office with cloud printing. YSoft OMNI Bridge® (with a 6-year warranty) instantly connects printers to the cloud, providing cost savings with no IT resources required and zero effort to deploy.

- **Heavily reduce time spent** by your IT team on configuring and troubleshooting appliances and VMs, so they can focus on your core business
- Get a substantially **smoother onboarding experience** than what you're used to with other physical appliances
- **Provide flexibility** to your users by enabling them to easily print from anywhere through the cloud with a fully cloud-connected printer fleet
- **Supercharge security to the edge** by keeping all company data local, enabling authentication, and storing all documents securely on your network

REAP THE BENEFITS OF THE COMPATIBILITY BETWEEN YOUR LEGACY AND CLOUD TECHNOLOGIES

1. Take advantage of the cloud
2. Supercharge security with zero-trust
3. Enjoy an easy, 3-step installation
4. Remove network architecture complexity
5. Make tech compatibilities a strong suit

REAP THE BENEFITS OF THE COMPATIBILITY BETWEEN YOUR LEGACY AND CLOUD TECHNOLOGIES

1 Take advantage of the cloud

When combined with SAFEQ Cloud or SAFEQ Managed, OMNI Bridge instantly kickstarts a hybrid deployment and connects networked printers to the cloud, enabling seamless printing whenever you need it.

2 Supercharge security with zero-trust

All printing is processed locally – and that's where your data is kept too, all while allowing you to store documents securely on your network and connect with authentication services.

4 Remove network architecture complexity ⊕

5 Make tech compatibilities a strong suit ⊕

REAP THE BENEFITS OF THE COMPATIBILITY

3 Enjoy an easy, 3-step installation

Simply hit 'add device' on your SAFEQ interface, connect the device by entering the serial number and device ID, and lastly, grant access privileges to your OMNI Bridge, including access to profiles and offline use.

4 Remove network architecture complexity

If users aren't on the same network or the network architecture is complex, use an OMNI Bridge to locate and unify the services where you need them.

5 Make tech compatibilities a strong suit

Maximize the value of your SaaS applications while keeping your on-prem systems accessible from anywhere. Leverage the compatibility of your legacy and modern technologies to achieve true hybrid printing.

2 Supercharge security with zero-trust

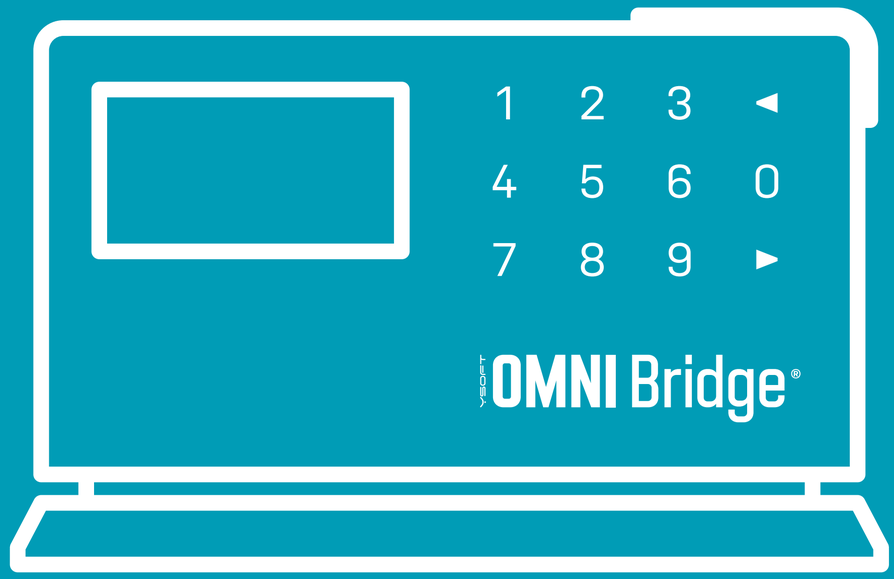

3 Enjoy an easy, 3-step insta

YSOFT OMNI BRIDGE KEY FEATURES

1. User authentication ⊕
2. High availability ⊕
3. Print roaming ⊕
4. Embedded apps ⊕
5. Cloud compatibility ⊕
6. Network resilience ⊕

1 User authentication

Multiple on-prem options (card/password and username/pin/user ID) as well as Active Directory and LDAP.

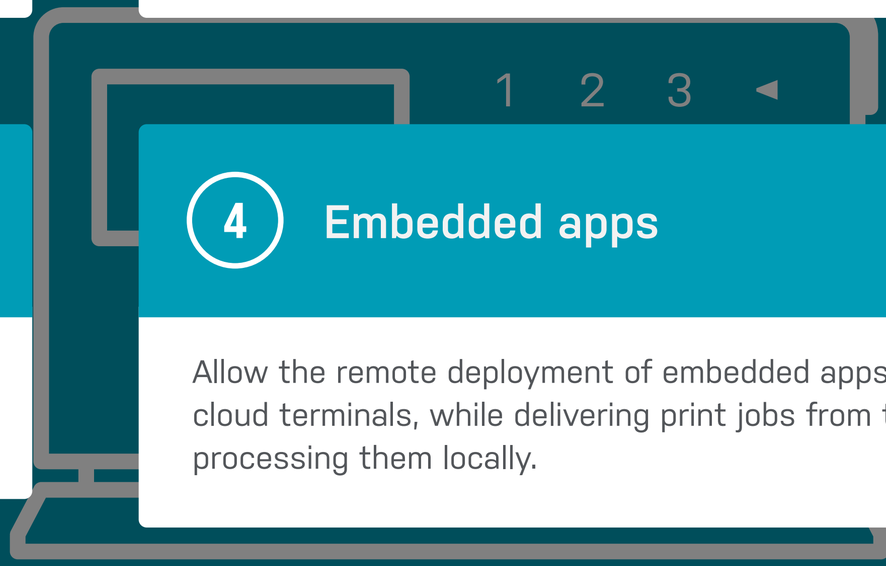

2 High availability

YSoft OMNI Bridge is made for high print availability, including remote management of your print fleet.

2 High availability ⊕

3 Print roaming

Hold print jobs prior to authentication-triggered release at any chosen printer.

4 Embedded apps

Allow the remote deployment of embedded apps for any non-cloud terminals, while delivering print jobs from the cloud and processing them locally.

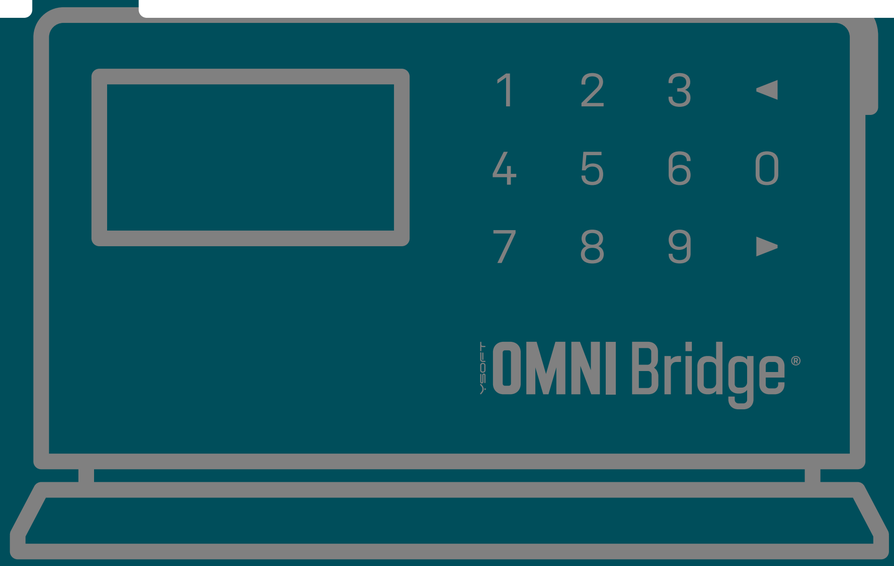

6 Network resilience ⊕

5 Cloud compatibility

Combine OMNI Bridge with SAFEQ Cloud or SAFEQ Managed to enable seamless printing whenever you need it.

6 Network resilience

The edge device (OMNI Bridge) allows you to bridge disparate customer networks with reliable failover and high resilience.

2 High availability ⊕

3 Print roaming ⊕

4 Embedded apps ⊕

5 Cloud compatibility ⊕

6 Network resilience ⊕

Y SOFT HELPS BUSINESSES & THEIR PEOPLE BUILD BETTER WAYS OF WORKING

With a market-leading product portfolio, advanced security, and a fierce commitment to innovate, **we bring next-level office solutions** that are cheaper than mental healthcare for IT Teams everywhere.

Y Soft is a global organization that develops intelligent next-gen office solutions for enterprises, SMBs, and education. Founded in 2000, the company is headquartered in Brno, Czech Republic, with offices in NALA, EMEA and APAC regions.
